SUMMARY

I am currently working at an e-commerce website builder, as part of the product page team. I develop and maintain complex frontend features using AngularJS, React.js, and Web Component, with a strong focus on performance optimization and scalability.

I worked as frontend developer for about 8 years. I am familiar with handle current web tool like webpack, next.js, rollup, cloud function. I also realized how to improve web performance and optimize SEO from the frontend side.

EXPERIENCE

Senior Frontend Engineer

Shoptline

February 2025 - Present, Taipei, Taiwan
